CERTIFICATE OF INTERNSHIP

RE: Manasa Hari

To Whom It May Concern:

Manasa Hari was employed as Intern, Software Engineer at Taulia Inc., in San Francisco, CA from May 26, 2020 through August 18, 2020. She was assigned to the Platform Engineering team and worked under the direction of Christoph Emmersberger, Director of Engineering. Taulia Inc. is a financial technology service provider developing financial software solutions to unlock capital in the financial supply chain and provide businesses on demand access to cash.

Ms. Hari contributed to the department success by developing an administrative configuration utility to setup external reference rate providers. External reference rates are used in Taulia's Supply Chain Financing solution to price early payments according to market rates. Ms. Hari's contribution allows Taulia to migrate a labour intensive, SQL script based configuration process to the business by using web-based forms with input validations. The process adjustment increases business' the visibility into the system by listing all existing provider configurations.

Ms. Hari collaborated with a team of three Senior Software Engineers, a Software Quality Engineer, a Product Manager and an Engineering Manager to identify the project scope and translate the requirements into executable user stories. Ms. Hari collaborated closely with the engineering team during the development phase to build out the user interface according to Taulia's internal tool standards using Groovy, Grails utilizing REST-full webservice that persist the configuration in a MySQL backed database. Ms. Hari utilized test-driven development practices and met Taulia's rigorous test and software quality expectations. Her project was completed ahead of time and was deployed to our production environment.

Ms. Hari exhibited professionalism, eagerness and organizational leadership skills to solve the tasks she was assigned. She kept her supervisor well informed about the project progress. Her communication and presentation skills are excellent and we wish to thank her for her contribution and wish her all the best as she finishes school and begins her professional career.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Christoph Emmersberger', is written over the printed name.

Christoph Emmersberger
Director of Engineering
